“This publication should be required reading for all those who want to get the estimating process right every time, it sets out the structures & disciplines essential for every vehicle damage assessor”
- The Institute of the Motor Industry.

The Essential Guide to Accurate Repair Costing

This guide will NOT tell you how to use a computerised estimating system but WILL show you how to pinpoint all the damage, and to identify and accurately cost the appropriate repair, irrespective of the system used. First time, every time.

Designed for both new and experienced vehicle damage assessors, this valuable resource brings together all the fundamentals of vehicle damage appraisal.

Compiled by industry expert Dave Shepherd, a leading member of the Estimating Accreditation and Systems Transparency (EAST) team, the VDA Manual is a culmination of his unrivalled industry knowledge and many years' hands-on experience. Dave also played a pivotal role in shaping the current ATA Vehicle Damage Assessor (VDA) Accreditation qualification.

Published by Plenham, the manual is written in a clear, concise and accessible style designed to instil professional good practice in all VDAs. It is an easy-to-use reference guide for all those involved, from the newest recruit to even the most experienced assessor.

“A great piece of work - this manual should become the bible for assessors”

Adam Murray, President Elect,
Institute of Automotive
Engineer Assessors
